CMM Programmer/Quality Inspector

CMM Programmer/Quality Inspector who can demonstrate proficiency in programming, setting up, and operating CMM machines. This is not a starting position and we are looking for an innovative candidate who understands time sensitive projects and exudes natural leadership skills. This position requires a minimum of 5 years' experience in programming, setting up, and operating CMM machines daily. The potential candidate will be asked to verify competency by presenting a portfolio of work and experience. This position is responsible for the efficient setup and inspection of parts on multiple CMM's and supporting the manufacturing team from first article inspection to final inspection. This position will inspect, test, or measure materials, products, installations, or work for conformance to specifications. This position will lead other inspectors within the area. This candidate's experience should include PC-DMIS programming and proficiency with hand tools.

Experience and Skills Shall Include:

- Programming, Setup, and operation of CMM Machines
- Interpreting GD&T and inspecting to the standard
- Reading blueprints, data, manuals, or other materials to determine specifications, inspection and testing procedures, adjustment methods, certification processes, formulas, or measuring instruments required
- PC-DMIS
- ERP Software; GlobalShop is a plus
- Microsoft Office
- The ability to listen and understand information and ideas presented through spoken words and written sentences
- The ability to communicate information and ideas in speaking so others will understand
- The ability to maintain a clean, organized, and safe work environment
